PROJECTS

E-COMMERCE STORE (FULL STACK WEB DEV)

TECHNOLOGY STACK

Utilized the MERN (MongoDB, Express.js, React, Node.js) stack with Redux.
Implemented Bootstrap, React, JavaScript, and various libraries to achieve project objectives.

KEY ACHIEVEMENTS AND FUNCTIONALITY

Developed a user-friendly website with seamless navigation, dynamic product data display, and efficient filtering. Implemented user registration with custom form components, ensuring data integrity, and enabled CRUD operations on both the frontend and backend for product and user data. Designed search filters for users and products and integrated various features using Redux Toolkit.

COMMERCIAL PROJECT (FULL STACK WEB DEV)
